

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

February 26, 2002 LB 600

I'm not going to be walked on by you. They want me to use that same fire to keep them and theirs from being walked on by the corporations. That's why I say, I look at my colleagues a lot of times like kids in a sandbox. And it sounds condescending, but that's the way I have to view my colleagues. I have to have more maturity, I have to have more understanding, believe it or not I have to be more forgiving because I have to work with you all and help you despite the wrongful things you try to do to me. And I say try because you can't do it. You will never whip me.

SPEAKER KRISTENSEN: Time.

SENATOR CHAMBERS: You think Molly Brown was unsinkable? I will show you something about being unsinkable. Excuse me, Mr. Speaker.

SPEAKER KRISTENSEN: Senator Erdman.

SENATOR ERDMAN: Thank you, Mr. Speaker, members. Haven't discussed LB 600 as of yet this year. I know that last year we discussed it a little bit. One of the things that I...that I've brought...I bring to the floor is obviously a different perspective from my part of the state, and that is the Panhandle. And we have some...some differences of agricultural products out there. As far as the...the income that's...that's viewed on the land, there's some things that need to be pointed out. When we start determining what...what income is on...on farmland, in the Panhandle there are no farm payments for dry beans. There are no farm payments for alfalfa. There is a, somewhat of a support program for...for sugar in the sugar policy, but there is no specific direct payment there. And so some of the discussions that we have are generally related to the...to the main crops of wheat, corn, and soybeans, and that's...that's great because those are the predominant crops grown in the state of Nebraska. But as we look at this piece of legislation, there are some underlying components that need to be addressed and is, does one size fit all? We also look at what the difference between the Panhandle is and what the difference is in eastern Nebraska. In the Panhandle we're going to get about 12 inches of rain if we're lucky. Now, in eastern
